

IFPHA's (Institute for Preventive Healthcare and Advocacy) mission is to promote optimum health by addressing the social determinants of health (SDOH) and the inequities in access to affordable preventive healthcare.

IFPHA is committed to creating inclusive environments, be continuous learners, and work alongside others to cultivate equity, diversity, inclusion, and unlearn destructive patterns from our historical past.

IFPHA brings health education, address preventable diseases, and managing chronic illnesses. Our community nurses' impact has been addressing the SDOH. Your donation will support and expand:

- Providing transportation to the doctor's appointment or the grocery store.
- Partnering with MAHEC to provide psychiatric residents for "door to door" visits.
- Providing healthy fresh fruit and vegetables and health education.
- Providing cleaning services to prevent evictions.
- Assessing client's needs and if there is no referral available, IPFHA will find funding to address the issue in "real time" while we are looking for a long-term solution.
